

Rubber Granules

Black recycled SBR granules from end-of-life tyres, supplied by the container.

PRODUCT OVERVIEW

Whole tyres are processed on our recycling line. Steel cord and textile fibre are separated from the rubber stream, which is then granulated and screened into nominal size ranges.

NOMINAL RANGE / SUPPLY FORM

Grade or property	Description
0.5 to 2 mm	Fine granules for tile blends, moulded goods and fine-infill systems
1 to 3 mm	Granules commonly considered for artificial-turf infill and track bases
2 to 4 mm	Granules commonly considered for wet-pour and track base layers
2 to 5 mm	Coarser granules commonly considered for wet-pour base layers

BEFORE A BUYER-SPECIFIC OFFER

These ranges are nominal, not a guaranteed particle-size curve. Send your specification so the exact fraction can be confirmed before quotation.

Packing, confirmed net loaded weight, freight, documents, payment and any testing or independent inspection are agreed for the specific order and recorded on the proforma.

A sample can be arranged for testing on the buyer's own equipment. Sample quantity and courier arrangements are confirmed with the buyer. This guide is not a lot-specific test report or a guarantee of application performance.
